

Supply Chain Services International

Position Title: Incoming Quality Inspector

Date Available: Immediately

Position Location: Seguin, TX

JOB TASK

The Incoming Quality Inspector inspects parts being received by the customer, using the proper inspection techniques and equipment, accurately, efficiently, and in a professional manner.

DUTIES AND RESPONSIBILITIES

- Inspect, or perform audits on incoming material, using measuring and gaging tools and visual techniques in determining conformance to engineering specifications
- Determine the method(s) and process(es) needed to measure part conformance, according to the allowed dimensional tolerances and normal gaging practices
- Document and report non-conformances to specifications using computerized quality documentation systems
- Contain non-conforming parts and materials
- Sort and rework non-conforming parts and material
- Prioritize the order of short-quantity loads, and manage FIFO flow of received goods
- Complete other duties and/or responsibilities as assigned

REQUIRED JOB SKILLS AND COMPETENCIES

- Comprehension-level knowledge and ability to interpret engineering drawings
- Comprehension-level knowledge and understanding of inspection techniques, and the selection and manipulation of measuring tools, equipment, and gages
- Demonstrated ability in interpreting engineering specifications
- Comprehension-level knowledge and ability to interpret geometrically dimensioned and toleranced engineering drawings
- Demonstrated ability in handling and maintaining precision measuring tools, equipment, and gages
- Perform visual inspection of painted surfaces, surface defects, cleanliness, and packaging
- Operating-level proficiency using computer software programs
- Able to unpack and repackage incoming materials safely and as instructed
- Operating-level knowledge of material handling equipment - pallet jacks and hoists
- Perform visual inspection of various types of welds.

REQUIRED EDUCATION AND RELATED EXPERIENCE

- Possess an earned high school diploma, or GED
- Possess a related 2- or 4-year technical degree preferred
- Previous work experience in a quality background is preferred
