

Supply Chain Services International

Position Title: Lead Quality Inspector

Date Available: 1/4/10

Position Location: Brooklyn Park, Minnesota

Objective

The Lead Quality Inspector maintains the proper material flow thru required processes, insuring that the service provided during the shift is conducted in an accurate, efficient, and timely manner, while meeting or exceeding customer expectations.

Essential Duties & Responsibilities

- Mentor and supervise workers.
- Maintain the customer's documented quality standards requirements.
- Insure the techniques for determining non-conforming product are accurate and repeatable.
- Maintain company databases by adding new part procedures and editing existing procedures.
- Assign daily workloads to insure the work is completed in a timely manner.
- Maintain company policies and procedures in accordance with directives from management.
- Interface with the customer in a professional manner, and maintain customer relations.
- Provide on-the-job training when needed.
- Complete other duties and/or responsibilities as assigned.

Requirements & Competencies

- Comprehension-level knowledge.
- Ability to interpret engineering drawings.
- Demonstrated ability in interpreting engineering specifications.
- Demonstrated proficiency in verbal- and written communications.
- Operating-level proficiency in using MS Office Suite application programs.
- Demonstrated multi-tasking ability, and able to perform all line job functions as needed.
- Comprehension-level of FIFO material flow applications.
- Comprehension-level knowledge of Zero Defects and similar quality practices.
- Comprehension-level knowledge of inspection techniques, measuring tools, and gages.
- Comprehension-level knowledge of logistics procedures and material handling procedures.

Education & Experience

- Technical degree or equivalent relevant experience in a manufacturing environment.
- Previous supervisory or management work experience is preferred.
