Peoria, IL 61615, U.S.A.

To Whom It May Concern,

As a service company, we do not produce any products and therefore do not purchase commodities made of materials that contain Conflict Minerals. Minerals in question are tantalum, tin, tungsten and gold that originated in the Democratic Republic of the Congo (DRC) or any adjoining country. All direct materials we supply customers are DRC Conflict Mineral Free.

Conflict Minerals Compliance: To the extent SCSI supplies direct materials containing 3TG to the customer under this an agreement/purchase order, SCSI commits to have a supply chain process to ensure and document a reasonable inquiry into the country of origin of the 3TG minerals incorporated into products it supplies to the customer. If requested, SCSI will promptly provide information or representations that the customer reasonably believes are required to meet its conflict minerals compliance obligations.
